

Through my professional knowledge in the economy, in the self-employment, in the service and in the craft as well as my subject-specific engagements, competences and motivators, I bring a lot of comprehensive, to participate in the material retention of the previous duty of duty of a butler in the British royal family. Maintaining a steadily positionable, ascendable orga- nality is through my central education trouble-free, as well as a long-term demonstrable experience of intellectual competence.

Due to my technician's work, which covers about 300 pages, I have designed the field of specialization - Hier- Maschinentchnik in all possible technical disciplines, without having been started by this, which allows me to act as a legal expert universally.

A problem-free penetration of domination areas and places is very good for me with the same well-being. Through a comprehensive individual economic view, I have always mastered this spiritually or am devoted to the HanoverEmpire to the utmost.

I have always been a very athletic person. Football, scooter skate, hockey, cycling, fitness, tennis, skiing, dancing, yoga, ... goes through my life seamlessly. Especially the football in the club SG- Weilimdorf, from the F - A youth active, then in the men's team district league, I am very inclined.

Legal unbiased, even before, again signify my attachment to the mass of the world's population in which I feel comfortable. My age of 47 is, in my opinion, just right in terms of my background to be able to compete as a butler at the Hanover Royal House. Through excellent study of the Mahabaratra, it allows me to be in the crowd constantly be able to speak and answer without having to escape in excuses, which is perceived by the general public as appealing.

I have good relationships with John Paul II, as well as with the Dalai Lama XIV, whom I visited twice under the most degraded conditions in the Himalayas.

My place of residence is already designed to be compatible with or for the Hanover Royal Family, and a renunciation of glory in order not to harm the HanoverRoyalHouse would be self-evident.

In the nuclear issue, I'm self-reliant on US Democratic Italian-English as the easiest-to-spread language.

With serving greetings

Thomas Nufer
